Profile Summary

Aspiring Software Engineer with hands-on experience in building real-world web applications and interactive projects. Strong understanding of problem-solving and application design, with a focus on creating user-friendly and efficient solutions. Hackathon winner with proven ability to work in team environments, think creatively, and deliver impactful results. Passionate about continuous learning and contributing to real-world software development.

Education

Bachelor of Science in Computer Science 2024 - 2028
Chandigarh Group of College, Mohali
CGPA : 7.78

10th / 12th 2024
Janta High School, Gorhna
10th Percentage: 75% , 12th Percentage: 80%

Experience

- **Web Development Internship** at CodSoft Sep 2025 - Oct 2025
  - Developed and designed responsive web pages with a focus on clean UI and user-friendly experience
  - Built interactive features to enhance user engagement and improve overall functionality
  - Collaborated on project tasks and followed structured development practices to meet deadlines
  - Debugged and optimized code to improve performance and ensure smooth execution
  - Gained practical exposure to real-world development workflows and project building

C Programming Intern at CODETECH IT SOLUTIONS Jul 2025 - Aug 2025
- Implemented multiple problem-solving programs focusing on logic building and algorithmic thinking
- Applied concepts like arrays, functions, and pointers to solve real-world programming tasks
- Analyzed and debugged code to ensure correctness and efficiency
- Practiced writing clean, structured, and optimized programs
- Strengthened foundational understanding of programming and computational thinking

Python Intern at CodVeda Sep 2025 - Oct 2025
- Built multiple Python-based applications focusing on logic building and problem-solving
- Applied concepts such as file handling, functions, and basic data structures in practical tasks
- Analyzed and debugged code to improve performance and reliability
- Followed structured coding practices for better readability and maintainability

Projects

File-handling
- Built a file-based data management system to store and retrieve structured information
- Implemented CRUD operations (Create, Read, Update, Delete) using file handling techniques
- Ensured data integrity through proper validation and error handling
- Optimized file processing for faster execution and better performance
- Applied structured programming practices for clean and maintainable code

Smart-Scheduler

- Developed a smart scheduling system to organize and manage tasks efficiently based on user priorities and deadlines
- Implemented logic to automate task allocation and improve time management and productivity
- Designed a user-friendly interface to add, update, and track tasks in a structured manner

Prinu-Pizza Website

- Developed a responsive pizza website with an attractive and user-friendly interface to showcase menu items
- Implemented structured navigation and categorized menu sections to enhance user experience
- Designed interactive elements to simulate a real-world food ordering interface and improve usability

Kishan All-In-One

- Developed an all-in-one application integrating multiple features/modules to solve everyday user tasks efficiently
- Implemented structured functionality with multiple sections to improve usability and provide a seamless user experience
- Designed an interactive and organized interface to manage different features within a single platform

RentNest

- Built a property rental web application to manage and display room listings efficiently
- Implemented dynamic features for listing management and user interaction to enhance usability
- Focused on responsive design and clean UI to provide a seamless browsing experience

Bharat-AI-Pro

- Developed an AI-based application designed to provide intelligent responses and assist users in solving real-world queries
- Implemented features for handling user input and generating dynamic outputs to simulate smart assistant functionality
- Designed an interactive and user-friendly interface to enhance user engagement and overall experience

Hear-Me

- Built an assistive technology-based application to improve accessibility through intelligent input-output processing
- Integrated real-time data handling to generate accurate and responsive outputs for enhanced user interaction
- Focused on creating an intuitive and accessible interface to support seamless user experience

VeritasNet-AI

- Developed an AI-based system to analyze and verify user-provided information, generating reliable and structured outputs
- Implemented intelligent data processing and validation techniques to improve accuracy and reduce misinformation
- Designed an interactive interface to handle user input and display results efficiently for better user experience

Barterly

- Developed a platform for exchanging goods/services without monetary transactions, promoting community interaction and sustainability
- Implemented features like item listing, search, and user interaction to enable smooth and efficient trading between users
- Designed an intuitive and user-friendly interface to enhance accessibility and overall user experience.

SafeMap

- Developed a safety-focused web application to help users identify and navigate safer locations in real time
- Implemented map-based features to display location data and improve user awareness about surroundings
- Designed an intuitive and responsive interface to ensure easy access to safety-related information

CGC-GFG-CampusBody

- Developed a platform to manage and showcase campus activities, technical events, and student initiatives
- Implemented structured sections for events, workshops, and community engagement to improve accessibility and user interaction
- Designed a clean and responsive interface to effectively represent a student tech community and enhance user experience.

MiniERP

- Developed a Mini ERP system in Java to manage and organize business-related data such as users, records, and operations efficiently
- Implemented multiple modules for handling tasks like data entry, retrieval, and management in a structured manner
- Applied object-oriented programming concepts to build a scalable and modular system.

PocketMate

- Developed a personal finance management application to track income, expenses, and budgeting efficiently
- Implemented features for recording transactions and generating structured financial data for better analysis
- Implemented features for recording transactions and generating structured financial data for better analysis.

Access-AI

- Developed an AI-powered learning platform to provide personalized guidance and improve accessibility in coding and AI education
- Implemented intelligent chatbot functionality to deliver interactive learning experiences and assist users in real-time
- Integrated user-friendly features and structured learning modules to enhance engagement and support diverse users

Skills

- **Languages:** C, JavaScript, Python, Java, C++, SQL, DSA, AI
- **Frontend:** React, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, FastAPI, Firebase, APIs
- **Databases:** Supabase, MongoDB, Firebase, MySQL
- **Tools:** Git, VS Code, Postman, Notion

Achievements & Leadership

- 2nd Place — 100 Days Coding Challenge, DevHive @ CGC University
- Hackathon Participant — VaultHeist, ISTE Hackathon, HackShastra, Smart India Hackathon (SIH), National Science Day 2025 Project
- Tech Team Member — CodeZen, Organized Web Development Workshops @ CGC University
- Event Team Member — GeeksforGeeks (GFG), Organized Code Catana 2.0
- Active Contributor — Technical Workshops & Training Sessions, CGC University
- Coding Contest Participant — HackerRank, GeeksforGeeks, Unstop, Coderush 9.0 Weekly Contest @ CGC Landran
- Quiz & Aptitude Competitions — TATA Crucible, Aptitude Tests, Multiple Events
- Dance Competition Winner — 1st, 2nd & 3rd Positions, CGC University
- Teamwork & Problem Solving — Hackathons & Competitive Programming Events
- Campus Mantri & Campus Ambassador — GeeksforGeeks (GFG), Led community initiatives and promoted technical learning across campus
- Management Leader — GeeksforGeeks (GFG), Managed event planning and coordinated team activities for smooth execution
- Technical Head — DCPD Titan, Led technical development and guided team members in project execution and problem-solving

Certifications

- **HTML** — HRCalcy
- **CSS** — HackerRank
- **C/C++** — Infosys
- **Problem Solving Certificate** — HackerRank
- **Generative AI Mastermind Program** — OutSkill
- **English Communication** — Infosys
- **Java Programming** — Infosys
- **Soft-Skills** — GeeksForGeeks
- **DSA Challenge** — CODECHEF
- **Angular Meets Generative AI** — D4 College Community
